PROPOSED SCHOOL AID

We already have mentioned sociation, and the Association of Chief School Administrators, School boards throughout the state are urging its passage, and most inearned income tax so that friction formed news sources are alerting the public to its value.

The smaller the area the more help would be available. For example, a board which has a district with real property value of \$160,000 now pays about \$3,700 as its share of each teaching unit. Under the new law its cost would be only \$1,120. A district with a property value of \$840,000 now pays about \$6,675. Under the proposed arrangement it would check out

The obvious purpose of this bill is to give relief to the smaller districts which have less market value on which to work when it comes to raising funds, and usually far less income from which to obtain tax money. For this reason the cities may buck it. Which suggests that local groups and individual taxpayers who want this kind of help from Harrisburg should be actively supporting it by writing and calling capitol officials.

SEWAGE PLANT ASSISTANCE

One of the biggest pains threatening the pocketbooks of small communities is the state clean streams law which says it is illegal to dump raw sewage into creeks and rivers. This is a rather obvious requirement that most of us agree should have been prevented years ago. But those who served on previous councils pinched the pennies so tightly that today's officials now are stuck with doing the job at excessive prices.

As state assistance for this kind of plant stands today you never know how much the annual amount will be, thus making it impossible to plan a budget for financing such a plant. Though the state has come through with payments in past years, it often has been very tardy and there is no guarantee of a specified amount.

An amendment has been proposed which would assure annual payments. Not only would the amount

be consistent, but it would be higher than the maximum of two per cent now allowed. To do this, of course, means that tax money must be found to assure these yearly reimbursements.

Again we return to the earned income tax, which we believe will be very much tied to any major steps of this nature. Small communities that need this kind of help in order to meet the requirements of the law, which apparently is about to be enforced, should be enlightening themselves concerning the facts and be ready to support such amendments and laws if they want them passed.

Write your state legislators, Assemblyman Allen M. Gibson and Senator Leroy E. Chapman.

WHO DIDN'T?

What we want to know is what car didn't win the Mobile economy run?

The fact is the run proves only that with skilled driving and careful nursing you can bring the mileage of most any car up near the 19 mpg point. But who can drive that way in today's traffic? The average motorist is boasting when he says he get 15 mpg, and a vast majority of us are not getting past that gas tank after we have burned a supply at 12 mpg.

We also cannot afford a fancy motor tune-up every time we take to the highway.

WHAT DO WE WANT?

We doubt if it is a domestic counterpart of the foreign puddlejumper. Most American families and its danger.

But we are tired of the over-long of our fingers on the wheel. car with its garish trappings. We room for our friends.

Their Future

and Yours Depends

The number of young men and women who want and deserve a college education will double by 1967. It's a sobering thought.

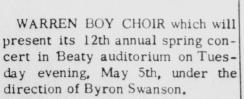

on Our Colleges

Our colleges and universities are making a valiant effort to take care of the hosts of eager-eyed young people who are already clamoring for admittance. They have an enormous job to do. For expansion calls for more than adding classrooms, laboratories and dormitory space. There must be a corresponding increase in faculty and in faculty caliber.

Freedom needs educated people. Won't you help overcome this crisis? Help the college of your choice today.

THE OBSERVER

The group has been rehearsing nightly for the performance which promises to be a colorful and delightful one.

Tickets for the event are now on sale at the United Cigar Store, Biekarck's Music House, and from choirboy parents.

"Why should a slow-poke burn me up?"

When you're driving,

your attitude can kill! When the stupidity or carelessness of other drivers makes you fume, watch yourself! If you let your anger take control of your car, you can literally kill or be killed yourself! Nearly 37,000 people died in traffic accidents last year. Many were victims of good drivers who for one fatal moment allowed their emotions to boil over. Check your boiling point and stay a safe driver.
